## Theoretical background

### Expert knowledge

#### **VEV (Electro technical Vocational Education Association) Industrial Equipment Engineer**

A 4-year course that focuses on increasing theoretical knowledge of the following:  
Drive technology / Direct and alternating current machines / Power electronics /  
Digital technology / Measurement and control engineering / Pneumatics

#### **VEV First Technician Industrial Equipment**

The course preceding the above one and includes the following subjects:  
Electricity / NEN 1010 and 3140 regulations / Energy and control technology

#### **VEV High Current System Technician**

#### **R.O.V.C Control Technology**

A course that focuses on the design of control systems by using electrical, electronic,  
digital and pneumatic components

#### **Elementary lifting techniques in the Entertainment World**

### Safety

V.C.A. 1 Safety Contractors' Checklist

V.C.A. vol Safety Contractors' Checklist for operational supervisors

Basic North Sea safety induction course

### Miscellaneous

Forklift truck certificate

Access platform certificate

Rope access and rescue

### Languages

**Dutch** Good speaking and writing skills

**English** Good speaking and writing skills

**German** Good speaking and reasonable writing skills

**French** Reasonable speaking and writing skills

**Frisian** Good speaking and reasonable writing skills

**Spanish** Some speaking and little writing skills

**Arabic** Little speaking and no writing skills

### Driver license A/B/C

### Software

Word / Excel / Outlook / Project / Autocad
